- **24x7 Monitoring and 24X7 Service Desk** with rapid response capabilities.
- Services are delivered using the customer's standards.

Venue Solutions for COVID-19

Building a technology roadmap for the re-opening of your venue.

Critical Technology Based Solutions Designed for Arenas & Venues

Washing Stations with PSA Screens

Sensor/No contact design with remote management software and highly visible hand sanitization function.

Thermal Cameras

Thermal sensing camera partnered with a stop-go monitor to determine admission access. No contact design for greatest safety.

Tracking and Data

Cloud based platform will allow you to track employees and identify risks in the workplace, while aggregating your real-time and historical data for your organization.

Facial Recognition Cameras

Identify and track employee fitness at entrances while developing a public entrance barrier for customers trying to enter in different perimeters.

Body Wearables

Wearable patch and watch option for your employees to track core body temperature during their work shift.

Line Monitoring/Crowd Intelligence

Create safe environments by developing strategies to promote healthy social distance and line monitoring throughout your venue and concourses.

Ingram Micro's Cost Reducing Options

*base example

CAPX: \$27,000 per entrance

OPX: \$834 per month (36 months)

Sponsorships: Contact sales rep for options to finance & develop sponsorship opportunities
